Date: November 9, 2022

TELA Bio Reports Third Quarter 2022 Financial Results

MALVERN, PA, November 9, 2022 -- TELA Bio, Inc. ("TELA Bio"), a commercial-stage medical technology company focused on providing innovative soft-tissue reconstruction solutions that optimize clinical outcomes by prioritizing the preservation and restoration of the patient's own anatomy, today reported financial results for the third quarter ended September 30, 2022.

Recent Highlights

- $Reported \ revenue \ of \$11.2 \ million \ for \ the \ third \ quarter, \ representing \ growth \ of \ 46\% \ over \ the \ same \ quarter \ of \ 2021;$
- Increased demand for OviTex® and OviTex PRS Reinforced Tissue Matrix products in the third quarter of 2022, resulting in a year-over-year revenue increase for each product of approximately 29% and 108%, respectively;
- Closed on an oversubscribed underwritten public offering yielding net proceeds of \$34.4 million; and Published 24-month BRAVO Study Results in *Annals of Medicine and Surgery*, highlighting a low 2.6% recurrence rate and clinically meaningful improvements in patient quality of life.

"We are very pleased to report another consecutive quarter of strong revenue growth and increased market adoption of our OviTex products despite lingering headwinds from COVID-19 affecting hospital staffing and procedure volumes. We anticipate a steady return to more customary procedure volumes as the impact of COVID-19 continues to subside. Furthermore, we expect the recently published favorable OviTex clinical data and growing market access through our recent GPO and Integrated Delivery Network contracts to be important growth drivers going forward," said Antony Koblish, co-founder, President and Chief Executive Officer of TELA Bio. "Additionally, following the close of our recent oversubscribed public offering in August that yielded net proceeds of \$34.4 million, we believe we are now even better positioned to accelerate expansion of our sales force and advance our business development initiatives and R&D programs as we seek to expand our product portfolio and its broad uptake."

Third Quarter 2022 Financial Results

Revenue was \$11.2 million in the third quarter of 2022, an increase of 46% compared to the prior year period. The increase was due to the expansion of our commercial organization, increased penetration within existing customer accounts and stronger international sales

Gross profit was \$7.3 million in the third quarter of 2022, or 66% of revenue, compared to \$4.6 million, or 60% of revenue, in the same period in 2021. The increase in gross margin was primarily due to a lower provision for excess and obsolete inventory.

Operating expenses were \$16.8 million in the third quarter of 2022, compared to \$11.8 million in the same period in 2021. The increase was due to higher salaries and employee-related expenses from additional headcount as we continue to expand our organization, increased travel expenses and increased consulting fees.

Loss from operations was \$9.5 million in the third quarter of 2022, compared to a loss from operations of \$7.2 million in the same period in 2021.

Net loss was \$10.7 million in the third quarter of 2022, compared to a net loss of \$8.3 million in the same period in 2021.

Cash and cash equivalents on September 30, 2022, totaled \$54.2 million.

2022 Financial Guidance

We continue to expect full year 2022 revenue to range from \$42 million to \$45 million, reflecting growth of 43% to 53% over full year 2021; however, a higher-than-expected impact from the COVID-19 pandemic in the fourth quarter could materially affect this projection.

Conference Call

TELA Bio will host a conference call at 4:30 p.m. Eastern Time on Wednesday, November 9, 2022 to discuss its third quarter 2022 financial results. Investors interested in listening to the conference call should register online. Participants are required to register a day in advance or at minimum 15 minutes before the start of the call. A replay of the webcast can be accessed via the Events & Presentations page of the investor section of TELA Bio's website.

About TELA Bio, Inc

TELA Bio, Inc. (NASDAQ: TELA) is a commercial-stage medical technology company focused on providing innovative technologies that optimize clinical outcomes by prioritizing the preservation and restoration of the patient's own anatomy. The Company is committed to providing surgeons with advanced, economically effective soft-tissue reconstruction solutions that leverage the patient's natural healing response while minimizing long-term exposure to permanent synthetic materials. For more information, visit www.telabio.com.

Caution Regarding Forward-Looking Statements

This press release contains forward-looking statements within the meaning of The Private Securities Litigation Reform Act of 1995. Words such as "may," "might," "will," "should," "believe," "expect," "anticipate," "extimate," "continue," "predict," "forecast," "project," "plan," "intend" or similar expressions, or statements regarding intent, belief, or current expectations are forward-looking statements and reflect the current beliefs of TELA's management. Such forward-looking statements include statements relating to our expected revenue and revenue growth for the full year 2022. These statements are not guarantees of future performance and are subject to certain risks, uncertainties and other factors that could cause actual results and events to differ materially and adversely from those indicated by such forward-looking statements including, among others: the impact to our business of the COVID-19 pandemic and the development of new variants of COVID-19, including but not limited to any impact on our ability to market our products, demand for our products due to deferral of procedures using our products, the labor and staffing environment in the healthcare industry, or disruption in our supply chain, our ability to achieve or sustain profitability, our ability to gain market acceptance for our products and to accurately forecast and meet customer demand, our ability to compete successfully, that data from earlier studies related to our products and interim data from ongoing studies may not be replicated in later studies or indicative of future data, that data obtained from clinical studies using our product may not be indicative of outcomes in other surgical settings, our ability to enhance our product offerings, development and manufacturing problems, capacity constraints or delays in production of our products, maintenance of coverage and adequate reimbursement for procedures using our products, product defects or failures. These risks and uncertainties are described more fully in the "Risk Factors" secti

Forward Looking Statements

This presentation contains forward-looking statements within the meaning of The Private Securities Litigation Reform Act of 1995. All statements other ti of historical facts contained in this document, including but not limited to statements regarding possible or assumed future results of operations, busines development plans, regulatory activities, market opportunity competitive position, potential growth opportunities, and the effects of competition, are forward opportunities. statements. These statements involve known and unknown risks, uncertainties and other important factors that may cause TELA Bio, Inc.'s (the "Compa results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forwar statements. In some cases, you can identify forward-looking statements by terms such as "may," "will," "should," "expect," "plan," "aim," "anticipate," "cou "target," "project," "contemplate," "believe," "estimate," "predict," "potential" or "continue" or the negative of these terms or other similar expressions. The statements in this presentation are only predictions. The Company has based these forward-looking statements largely on its current expectations and r about future events and financial trends that it believes may affect the Company's business, financial condition and results of operations. These forward statements speak only as of the date of this presentation and are subject to a number of risks, uncertainties and assumptions, some of which cannot be quantified and some of which are beyond the Company's control, including, among others: the impact to the Company's business of the ongoing COVID and the development of new variants of COVID-19, including but not limited to any impact on the Company's ability to market its products, demand for the products due to deferral of procedures using the Company's products, the labor and staffing environment in the healthcare industry, or disruption in the supply chain, the Company's ability to achieve or sustain profitability, the Company's ability to gain market acceptance for the Company's products and forecast and meet customer demand, the Company's ability to compete successfully, that data from earlier studies related to the Company's products ar from ongoing studies may not be replicated in later studies or indicative of future data, that data obtained from clinical studies utilizing the Company's pr be indicative of outcomes in other surgical settings, the Company's ability to enhance the Company's product offerings, development and manufacturing capacity constraints or delays in production of the Company's products, maintenance of coverage and adequate reimbursement for procedures using the products, product defects or failures. These and other risks and uncertainties are described more fully in the "Risk Factors" section and elsewhere in the filings with the Securities and Exchange Commission and available at www.sec.gov. You should not rely on these forward-looking statements as predict events. The events and circumstances reflected in the Company's forward-looking statements may not be achieved or occur, and actual results could di from those projected in the forward-looking statements. Moreover, the Company operates in a dynamic industry and economy. New risk factors and unc emerge from time to time, and it is not possible for management to predict all risk factors and uncertainties that the Company may face. Except as requir applicable law, we do not plan to publicly update or revise any forward-looking statements contained herein, whether as a result of any new information, changed circumstances or otherwise
